peace is a universal ideal but its political life is a great paradox peace is the opposite of war but it also enables war if peace is the elimination of war then what does it mean to wage war for the sake of peace what does peace mean when some say that they are committed to it but that their enemies do not value it why is it that associating peace with other ideals like justice friendship security and law does little to distance peace from war although political theory has dealt extensively with most major concepts that today define the political it has paid relatively scant critical attention to peace the very concept that is often said to be the major aim and ideal of humanity in war for peace murad idris looks at the ways that peace has been treated across the writings of ten thinkers from ancient and modern political thought from plato to immanuel kant and sayyid qutb to produce an original and striking account of what peace means and how it works idris argues that peace is parasitical in that the addition of other ideals into peace such as law security and friendship reduces it to consensus and actually facilitates war it is provincial in that its universalized content reflects particularistic desires and fears constructions of difference and hierarchies within humanity and it is polemical in that its idealization is not only the product of antagonisms but also enables hostility war for peace uncovers the basis of peace s moralities and the political functions of its idealizations historically and into the present this bold and ambitious book confronts readers with the impurity of peace as an ideal and the pressing need to think beyond universal peace

there are legal limits on the circumstances under which states may use military force to address a perceived or actual threat the concepts of necessity and proportionality are central to these limitations imposed by the law necessity and proportionality in international peace and security law explores the many ways in which necessity and proportionality arise in the law on the modern battlefield which is rapidly changing complex and ambiguous

this book examines the relation between religion and jurisprudence god and peace respectively it argues that in order to elucidate the possible role religion can play in the contemporary world it is useful to analyse religion by associating it with other concepts why peace because peace is probably the greatest promise made by religions and the greatest concern in the contemporary world why jurisprudence because quoting kelsen s famous book peace through law peace is usually understood as something achievable by international legal instruments but what if we replace peace through law with peace through religion does law as an instrument for achieving peace incorporate a religious dimension is law ultimately a religious and normative

construction oriented to peace to the protection of humanity in order to keep humans from the violence of nature is the hope for peace rational or just a question of faith is religion itself a question of faith or a rational choice is the relatively recent legal concept of responsibility to protect a secular expression of the oldest duty of humankind the book follows the structure of interdisciplinary research in which the international legal scholar the moral philosopher the philosopher of religion the theologian and the political scientist contribute to the construction of the necessary bridges moreover it gives voice to different monotheistic traditions and more importantly it analyses religion in the various dimensions in which it determines the authors cultures as a set of rituals as a source of moral norms as a universal project for peace and as a political discourse
