in the path not taken jeff horn argues that contrary to standard anglocentric accounts french industrialization was not a failed imitation of the laissez faire british model but the product of a distinctive industrial policy that led over the long term to prosperity comparable to britain s despite the upheavals of the revolution and the napoleonic wars france developed and maintained its own industrial strengths france was then able to take full advantage of the new technologies and industries that emerged in the second industrial revolution and by the end of the nineteenth century some of france s industries were outperforming britain s handily the path not taken shows that the foundations of this success were laid during the first industrial revolution horn posits that the french state s early attempt to emulate britain s style of industrial development foundered because of revolutionary politics the threat from below made it impossible for the state or entrepreneurs to control and exploit laborers in the british manner the french used different means to manage labor unruliness and encourage innovation and entrepreneurialism technology is at the heart of horn s analysis and he shows that france unlike england often preferred still profitable older methods of production in order to maintain employment and forestall revolution horn examines the institutional framework established by napoleon s most important minister of the interior jean antoine chaptal he focuses on textiles chemicals and steel looks at how these new institutions created a new industrial environment horn s illuminating comparison of french and british industrialization should stir debate among historians economists and political scientists
